Ultra-Lok Application Tools

UL9010 Ultra-Lok Electric Tool

Ideal for hose clamping, this powerful hand-held tool can apply 1/2" and 3/4" Ultra-Lok clamps, either preformed or free-end anywhere you can plug into an AC outlet.

Adjustable speed and torque controls guarantee consistent tensioning and one-person operation saves on labor expenses.

UL4000 Rechargeable Ultra-Lok Tool

Designed for portable requirements, the UL4000 allows you to install patented Ultra-Lok clamps virtually anywhere. Without generators...without compressors...without unwieldy cords or hoses.

The UL4000's unique design allows consistent, repeatable tensioning and locking under full tension. This insures that each and every clamp will have the same strength and holding characteristics.

Is installation time critical? Field tests show that Ultra-Lok clamps can be applied four times faster than conventional band clamps.

Ultra-Lok

IT9000 Electric Bench Mount Tool

The IT9000 answers the need for a user-friendly bench tool that makes a precise, repeatable assembly time after time. And to verify actual pull-up tensions, the IT9000 includes a printer port for documentation.

Features include an automatic reset, cut-off and tail ejection, a 22 inch single-pull take-up, heavy duty gearing and electronically controlled clamp installation.

For hose applications, the IT9000 quickly and easily forms assemblies that are as strong as or stronger than crimp or swage fittings at a much lower overall cost.

Interchangeable heads for 1/2" wide or greater BAND-IT Ultra-Lok, Jr. Clamps, and Center Punch clamps are available.
